

RAW PROPOLIS

European company, global perspective

PROPOLIS

The health power of nature

Propolis is a rich mixture of resinous organic compounds collected by bees. Thanks to its healing properties (e.g. antiseptic, antibacterial, antiviral, immunomodulating, anti-cancer), propolis is one of the most important natural products of pharmacological significance.

For over 25 years, the company PROKIT has been promoting this health gift of our little friends. We work with pharmaceutical, cosmetic and dietary supplement manufacturers all over the world (in particular from Europe and Asia), providing them with high - quality propolis.

Our mission is to
share the best that
bees share with us.

Tradition and Modernity

People who work with bee products know how difficult it is to achieve a constant high quality in big lots of propolis. Additionally, each customer has individual requirements because of character of their production. That's why we pay so much attention to the quality management procedures. We cooperate with research institutes and certified labs all over Europe to supply our clients exactly such propolis as they need.

Everybody knows how important bees are for the whole life on Earth. The bees had been present in my life since my childhood. My father had an apiary. After I was graduated at Warsaw University as molecular biologist I took over company PROKIT, which had been founded by my grandfather, and I started to deal with the propolis.

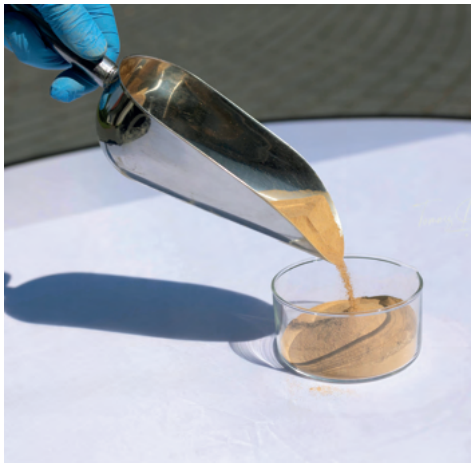

Miłosz Górecki,
PROKIT OWNER

About our company

PROKIT – propolis specialists

We have been buying raw propolis from beekeepers and beekeeping cooperatives from Poland since 1996. We started as a small family company to become international specialists in propolis.

The purchased propolis is thoroughly analysed and classified in terms of quality, and after standardization we deliver it to companies, mainly in the European Union (Poland, Germany, Czech Republic, Croatia, France, Latvia, Estonia and Finland), but we also export to Asia (e.g. to Jordan and Taiwan).

Our quality standards

We work according to HACCP procedures. We are under the supervision of the State Veterinary Inspectorate.

Our propolis meets the Polish standard PN-R-78891. We also have a current Bio Certificate for the processor of ecological products: PL-EKO-09/0081/22.

On the recipient's request, we can do an individual set of analyses for each delivery, e.g.:

- microbiological activity
- residues of antibiotics
- heavy metals content
- residues of pesticides
- radioactivity
- flavonoids content

Some analyses are performed in our internal laboratory, others are outsourced to certified external labs.

Brown, red, green...

Propolis in our offer

Raw propolis of Polish origin...

We offer our wholesale customers high quality Polish raw propolis in batches of 200 – 300 kg. We obtain our propolis directly from beekeepers, so we are able to evaluate it effectively and segregate it in qualitative terms. Thanks to cooperation with research units, for each batch we can perform tests according to the buyer's order (e.g. for antibiotic content).

...and not only!

We can also offer propolis from other regions of Europe, including Bio propolis from Bulgaria, and even from India and South America (e.g. green propolis from Brazil). Years of presence on the market, interest in the miraculous properties of propolis and the constant desire to discover new paths of development mean that today we cooperate with suppliers from all over the world!

Examples of the types of raw propolis we offer:

■ brown propolis from European Union countries (Poland, Romania, Hungary, Bulgaria)

■ brown propolis from the European climate zone (e.g. from Ukraine)

■ BIO brown propolis from European Union countries

■ red propolis from India

■ green propolis from Brazil

■ brown propolis from Argentina

Reliability and individual approach to the customer

We set the price individually, depending on the requirements for the goods. We guarantee the continuity of cooperation and delivery. Long-term presence of our company on the market proves that we are a reliable partner. This is confirmed by our regular customers who have been buying batches of between 2 kg and 500 kg from us for years at regular intervals.

To our clients looking for extracts, we can also offer dry and liquid propolis extracts (ethanolic or non-ethanolic), which we prepare in cooperation with another experienced Polish company.

We invite you to read the specifications of raw propolis offered by PROKIT. Thank you!

Brown bee propolis – raw material

SYMBOL: PR / EU /39

country of origin	Poland, Romania, Bulgaria, Hungary (EU)
storage conditions	temperature below 18°C, protect from light (according to PN-R-78891)
shelf life	2 years (according to PN - R - 78891)
colour	yellow to dark brown, with greenish or reddish tints
fragrance	balsamic, pleasant
consistence	hard and brittle at a temperature of <20°C, viscous and plastic at> 20°C
ethanol – soluble matter content	min. 45%
features disqualifying according to PN - R - 78891	none
chloramphenicol	not detected (in - house procedure, LOQ=0,3ppb)
tetracyclines	not detected (in - house procedure, LOQ=100ppb)
packing	10 kg LDPE bags and cardboard boxes

Brown bee propolis – raw material

SYMBOL: PR / EU1 /40

country of origin	Poland, Romania, Bulgaria, Hungary (EU)
storage conditions	temperature below 18°C, protect from light (according to PN-R-78891)
shelf life	2 years (according to PN - R - 78891)
colour	yellow to dark brown, with greenish or reddish tints
fragrance	balsamic, pleasant
consistence	hard and brittle at a temperature of <20°C, viscous and plastic at> 20°C
ethanol – soluble matter content	min. 55%
features disqualifying according to PN - R - 78891	none
chloramphenicol	not detected (in - house procedure, LOQ=0,3ppb)
tetracyclines	not detected (in - house procedure, LOQ=100ppb)
packing	10 kg LDPE bags and cardboard boxes

Brown bee propolis BIO – raw material

SYMBOL: PR/BIO/41

country of origin	European Union (Bulgaria/Romania)
storage conditions	temperature below 18°C, protect from light (according to PN-R-78891)
shelf life	2 years (according to PN - R - 78891)
colour	yellow to dark brown, with greenish or reddish tints
fragrance	balsamic, pleasant
consistence	hard and brittle at a temperature of <20°C, viscous and plastic at> 20°C
ethanol - soluble matter content	min. 50%
features disqualifying according to PN - R - 78891	none
packing	10 kg LDPE bags and cardboard boxes
BIO certificate of the processor	PL-EKO-09/0081/22

Brown bee propolis – raw material

SYMBOL: PR/ECZ/42

country of origin	European Climate Zone (EU, Ukraine, Serbia, Turkey)
storage conditions	temperature below 18°C, protect from light (according to PN-R-78891)
shelf life	2 years (according to PN - R - 78891)
colour	yellow to dark brown, with greenish or reddish tints
fragrance	balsamic, pleasant
consistence	hard and brittle at a temperature of <20°C, viscous and plastic at> 20°C
ethanol - soluble matter content	min. 45%
features disqualifying according to PN - R - 78891	none
packing	10 kg LDPE bags and cardboard boxes

Green bee propolis – raw material

SYMBOL: PR/BR/44

country of origin	Brazil
storage conditions	temperature below 18°C, protect from light (according to PN-R-78891)
shelf life	2 years (according to PN - R - 78891)
colour	brownish, olive grey; extract in shades of green
fragrance	sharp, characteristic
consistence	hard and brittle at a temperature of <20°C, viscous and plastic at> 20°C
ethanol - soluble matter content	min. 50%
features disqualifying according to PN - R - 78891	none
packing	10 kg LDPE bags and cardboard boxes

Red bee propolis – raw material

SYMBOL: PR/IN/45

country of origin	India
storage conditions	temperature below 18°C, protect from light (according to PN-R-78891)
shelf life	2 years (according to PN - R - 78891)
colour	dark brown with a reddish tinge; red wine-coloured extract
fragrance	balsamic, peasant, characteristic
consistence	hard and brittle at a temperature of <20°C, viscous and plastic at> 20°C
ethanol - soluble matter content	min. 50%
features disqualifying according to PN - R - 78891	none
packing	10 kg LDPE bags and cardboard boxes

We invite you to cooperate!
